## From the Birthplace of Ground Golf to the GG Enthusiasts Around the World ~Yurihama, Tottori Prefecture, Japan~

Since its creation in 1982 in the town of Yurihama (formerly Tomari), ground golf has become a sport loved by many people. Along with ground golf's increase in popularity, the technology and skill that has gone into the manufacturing of the clubs, balls, and other equipment, has also greatly improved over the years.

With the cooperation of the manufacturers of the Japan Ground Golf Association's equipment, Yurihama, the birthplace of ground golf, is pleased to help make this equipment available to overseas GG enthusiasts at a special discounted price. We invite you to try this high-quality equipment, which brings together the manufacturing capabilities developed and honed in the country that brought you the sport itself.

We hope that we will be able to further expand the circle of friendship and promote healthy lifestyles through ground golf!

# How to Place an Order

① Please describe your desired product in English or Japanese on the "Order Form" (Page 3 of the catalog).

Please email "Order Form" to the Yurihama Machizukuri Company at the following email address:  
[ [yurihama.ground.golf@gmail.com](mailto:yurihama.ground.golf@gmail.com) ]

The Yurihama Machizukuri Company will contact you and let you know whether the merchandise is available and in-stock.

After confirming the contents of your order and the items available, please inform the Yurihama Machizukuri Company of your final order.

The Yurihama Machizukuri Company will then send you the "Order Confirmation Form".

The bank details for necessary for payment will be listed on the "Order Confirmation Form".

Please complete payment in Japanese yen.

Once payment is confirmed, we will arrange the product.

Therefore, it takes about one or two weeks from the completion of payment to the shipment of the product.

Once all the items you ordered have arrived from the manufacturer to us, we will ship the items to you.

## Important Notes

\*Products are basically sent by Japan Post airmail. However, if Japan Post airmail cannot be used, the shipping method will be changed. We can also send by sea mail, so please let us know if you would like to do so. (\*Only for countries where sea mail is available)

\*You will be responsible for any bank charges incurred in your country and Japan and the intermediary bank.

\*Customers are responsible for any fees incurred during customs clearance.

\*For airmail, it takes about 1-6 weeks for the package to arrive at your country's customs after being shipped from Japan. For sea mail, it can take 3-4 months depending on the country.

\*We(Yurihama Town Hall) will bear the shipping fee for the time being, with the feeling of gratitude for your purchase.

# ROOTS *in* HERE™

THE ROOTS of GROUND GOLF  
are in TOMARI.

The birthplace series released in Yurihama Town,  
where ground golf was born.

Yurihama-cho  
(formerly Tomari-son)

## Ground golf mecca “Shiokaze no Oka Tomari” - Hill of the Sea Breeze -

Ground golf was established in 1982 in Yurihama-cho (formerly Tomari-son) as part of a lifelong sports promotion program. Since the rules are simple and no particularly advanced skills are required, it has spread as a sport that can be enjoyed by both children and adults, and has developed into a national pastime with over 3 million enthusiasts in Japan. Built on a small hill overlooking the Sea of Japan, “Shiokaze no Oka Tomari” is considered the mecca for ground golf, and in recent years it has hosted 200 tournaments annually, including international and birthplace tournaments.

To further expand the circle of health and friendship from its birthplace “Yurihama-cho,” we have prepared a lineup of GG equipment.

THE ROOTS of GROUND GOLF are in TOMARI. **ROOTS *in* HERE**

The ROOTS in HERE series incorporates the beauty of nature such as the tides, the wind, and the hilly terrain into its design based on the motif of “Shiokaze no Oka Tomari.” The club head is designed to evoke the gentle topography of a hilly terrain, and the cavity shape is reminiscent of a terraced course, expressing the strength of nature, while the shaft and other design features evoke the flow of the tides and wind, expressing the suppleness of nature.

This series will inspire a new sense of excitement in your play while you experience the natural surroundings of the birthplace of ground golf.

# 3D CLUB

**01**

## 2-HOLD GRIP FOR EASY CONTROL

By enlarging the grip end, it prevents slipping out and enhances the hold feeling during the swing.

**02**

## EASY TO GRIP FOR ANYONE WITH COUNTERBALANCE

By lowering the head balance, it improves the operability and the goodness of the swing, leading to a stable swing.

**03**

## 3D SHAFT WITH NEW FACE BALANCE SYSTEM

By making the shaft a three-dimensional structure, it is possible to directly approach the sweet spot during the swing.

**04**

## HUMAN ENGINEERING SMOOTH HEAD

A smooth swing is achieved with a shape that allows you to hold the club at any angle and a sole that has a calculated swing angle.

Conventional Straight Club

ASPRYER 3D Club

ASPRYER  
3D Club

Head Parallel

Head Down

Conventional  
Straight Club

The shaft has a three-dimensional structure. Therefore, compared to conventional products, the core and the striking surface can be visually recognized straight.

The three-dimensional structure makes the face evenly balanced and the head parallel. It becomes easier to make a stable swing.

| Impact Slugger<br>BH2501   | Bakelite<br>P24                                   | Entry model with slender shaft. Equipped with a hard bakelite face. Features an exhilarating clack sound.   | Around<br>615g<br>In case of 84cm |

## Carbon

Hard face featuring a high pitched, pleasant hitting sound and good ball release. The protective coating on the surface is hard to deteriorate, making it easy to hit on turf fields.

## TPU

New material face that combines a good hitting feel with a firm hitting sound and resilience. It also has excellent scratch resistance and can be used in any field. Higher repulsive performance is achieved by varying the hardness and by sandwiched different materials inside.

## Urethane Foam

Soft face that reduces impact on the hand and provides a good hitting feel. High scratch resistance makes it strong on dirt and gravel grounds.

## Club Size Guideline

Since there are individual differences in physique, please use this information only as a reference when you are not sure which club to choose.

# BALL

| Ball List                       | Structure | Weight       |
|---------------------------------|-----------|--------------|
| AERO BALL<br>BH3861 <b>NEW</b>  | Hollow    | Around 94g   |
| Navigation Ball<br>BH3851       | Hollow    | Around 94g   |
| WIN4<br>BH3433                  | Solid     | Around 94g   |
| Light 76<br>BH3412              | Solid     | Around 76g   |
| Shoot Ball<br>BH3460            | Solid     | Around 94.5g |
| Color Ball<br>BH3001 <b>NEW</b> | Solid     | Around 94g   |

The center of the ball is hollow. The hollow center of the ball makes the outside of the ball heavier, so centrifugal force acts on it when it rolls, and it rolls well. In order to maintain strength, a hard and rigid resin is used, making the ball very responsive.

This ball is filled with resin all the way to the center of the sphere. It is characterized by its vivid color. The inner core repels and rolls powerfully. The hardness of the resin between the inner core and the cover layer that covers it can be varied to create a ball with good feel.

## Ball Handling

- Do not use for any purpose other than ground golf.
- Store in a place away from direct sunlight.

Concentrated blows may cause rapid wear.

Do not use deteriorated or scratched items.

After use, wipe off any dirt thoroughly.

# NEW 3D PERSIMMON MASTER EDITION

BH2921 29,520 JPY

[MATERIAL] HEAD : persimmon, carbon, TPU, brass  
 SHAFT : maple tree, brass pipe,

# NEW AERO BALL

BH3861

1,400 JPY

SIZE: 60mm WEIGHT: about 94g  
[MATERIAL] Special synthetic resin  
PLACE OF PRODUCTION: Japan JGGA certified product

POINT  
**1**

## Get more distance! New 3-layer structure

The core is made of highly resilient resin, which provides great distance. The mid is made of resin that provides a good hitting feeling, and the cover is made of highly abrasion-resistant resin, making this the first new 3-layer structure for Hatachi.

POINT  
**2**

## Hollow structure for maximum distance

The ball has no blades and is empty at the center, improving its rolling performance. The weight distribution is also evenly balanced, resulting in a ball with a more refined roll.
