

GROUND GOLF CATALOG 2026

YURIHAMA MACHIZUKURI Co.,Ltd.

From the Birthplace of Ground Golf to the GG Enthusiasts Around the World ~Yurihama, Tottori Prefecture, Japan~

Since its creation in 1982 in the town of Yurihama (formerly Tomari), ground golf has become a sport loved by many people. Along with ground golf's increase in popularity, the technology and skill that has gone into the manufacturing of the clubs, balls, and other equipment, has also greatly improved over the years.

With the cooperation of the manufacturers of the Japan Ground Golf Association's equipment, Yurihama, the birthplace of ground golf, is pleased to help make this equipment available to overseas GG enthusiasts at a special discounted price. We invite you to try this high-quality equipment, which brings together the manufacturing capabilities developed and honed in the country that brought you the sport itself.

We hope that we will be able to further expand the circle of friendship and promote healthy lifestyles through ground golf!

How to Place an Order

① **Submit the Order Sheet**

Please complete the « Order Sheet » (found on page 3 of the catalog) in English or Japanese and email it to: yurihama.ground.golf@gmail.com

② **Stock Confirmation**

The Yurihama Machizukuri Company will check availability with the manufacturer and notify you of the status.

③ **Finalize Your Order**

If any items are out of stock, please adjust your selection. We will then finalize your order together.

④ **Receive the Order Confirmation Form**

We will send you an « Order Confirmation Form » including payment details. Payments must be made in **Japanese Yen**. We accept bank transfers and major credit cards (Visa, MasterCard, JCB, American Express, Diners Club, Discover).

⑤ **Order Processing**

Order preparation begins once your payment is confirmed. This typically takes **1 to 2 weeks**.

⑥ **Shipping**

Once all items have arrived from the manufacturer, we will ship your order.

Important Notes

- ① Orders are generally shipped via **Japan Post Airmail**. If Airmail is unavailable to your region, we will select an alternative method. **Sea Mail** is also available upon request (limited to supported countries).
- ② All bank charges—including those incurred in your country, in Japan, and by any intermediary banks—are the responsibility of the customer.
- ③ Customers are responsible for any customs clearance fees or import duties incurred in their country.
- ④ Airmail typically takes **1–6 weeks** to reach your country's customs. Sea Mail may take **3–4 months** depending on the destination.
- ⑤ As a token of our appreciation, **Yurihama Town Hall will cover the shipping fees** for your order for the time being.

ROOTS *in* HERE™

THE ROOTS of GROUND GOLF are in TOMARI.

The birthplace series released in Yurihama Town, where ground golf was born.

Yurihama-cho
(formerly Tomari-son)

Ground golf mecca “Shiokaze no Oka Tomari” - Hill of the Sea Breeze -

Ground golf was established in 1982 in Yurihama-cho (formerly Tomari-son) as part of a lifelong sports promotion program. Since the rules are simple and no particularly advanced skills are required, it has spread as a sport that can be enjoyed by both children and adults, and has developed into a national pastime with over 3 million enthusiasts in Japan. Built on a small hill overlooking the Sea of Japan, “Shiokaze no Oka Tomari” is considered the mecca for ground golf, and in recent years it has hosted 200 tournaments annually, including international and birthplace tournaments.

To further expand the circle of health and friendship from its birthplace “Yurihama-cho,” we have prepared a lineup of GG equipment.

THE ROOTS of GROUND GOLF are in TOMARI. **ROOTS *in* HERE**

The ROOTS in HERE series incorporates the beauty of nature such as the tides, the wind, and the hilly terrain into its design based on the motif of “Shiokaze no Oka Tomari.” The club head is designed to evoke the gentle topography of a hilly terrain, and the cavity shape is reminiscent of a terraced course, expressing the strength of nature, while the shaft and other design features evoke the flow of the tides and wind, expressing the suppleness of nature.

This series will inspire a new sense of excitement in your play while you experience the natural surroundings of the birthplace of ground golf.

	88cm	●	●	●

Shaft design

red navy purple

Point 1

A urethane face is used to suppress noise and achieve a quiet design.

Point 2

It absorbs shock at ball impact, enabling strong and confident swings.

Point 3

Its brass sole creates a low center of gravity that enhances swing stability.

Featuring a multi-layer face structure, this model is engineered for a clear and resonant sound.

ASPRYER

CLUB

Club List	Face	Feature	Weight
King Karin Gold master BH2897 NEW 	Glass Fiber TPU	The Karin Club features weight and firmness to extend roll distance. Its rigid, strong shaft also offers high maneuverability.	Around 655g In case of 84cm
Ultimate Urethane Club 2 Beyond shot BH2882X NEW 	Urethane Foam TPU	Japanese-made urethane club featuring a new ultra-high elasticity urethane material with 37% increased rebound	Around 640g In case of 84cm
Ultimate Urethane Club 2 BH2882 	Urethane Foam	Thick, soft face for a bouncy ball feel. The large sole and scratch-resistant face provide a sturdy design that can withstand hard use.	Around 635g In case of 84cm
3D PERSIMMON MASTER EDITION BH2921 NEW 	Carbon TPU	The top-of-the-line club Persimmon is now equipped with a 3D shaft using patented technology for improved surface stability. A top-of-the-line club for more accurate shots at greater distances.	Around 710g In case of 84cm
Persimmon Classic 5 BH2914 	Carbon TPU	Equipped with a 3-layer face made of carbon sandwiched between TPU. Powerful hitting by utilizing the weight of the club.	Around 650g In case of 84cm
NAVIGATION DRIVE CLUB BH2864 	TPU	Next generation standard club with high distance performance TPU face and low price.	Around 615g In case of 84cm
Impact Slugger BH2501 	Bakelite	Entry model with slender shaft. Equipped with a hard bakelite face. Features an exhilarating clack sound.	Around 615g In case of 84cm
Karin Club 6 BH2896 	TPU	Harder and heavier than Persimmon, made of famous Pear wood. Duraface with two layers of hard grade TPU material for a pleasant hitting sound.	Around 640g In case of 84cm
Powered Sole Club 3 BH2863 	Glass Fiber TPU	Equipped with a 3-layer face made of fiberglass sandwiched between TPU. T-shaped head with low center of gravity makes it easy to aim straight.	Around 625g In case of 84cm
Double Force Club BH2875 	Hard Carbon Soft Urethane Foam	A club for the technically inclined with a hard face and a soft face on both sides. You can choose the type of club you want to use depending on the situation.	Around 610g In case of 84cm

TPU

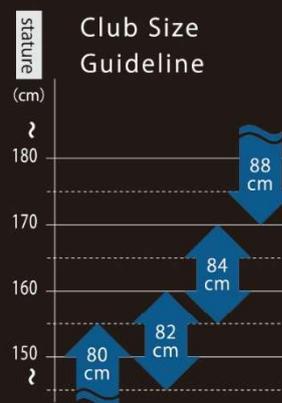

New material face that combines a good hitting feel with a firm hitting sound and resilience. It also has excellent scratch resistance and can be used in any field. Higher repulsive performance is achieved by varying the hardness and by sandwiched different materials inside.

Urethane Foam

Soft face that reduces impact on the hand and provides a good hitting feel. High scratch resistance makes it strong on dirt and gravel grounds.

Carbon

Hard face featuring a high pitched, pleasant hitting sound and good ball release. The protective coating on the surface is hard to deteriorate, making it easy to hit on turf fields.

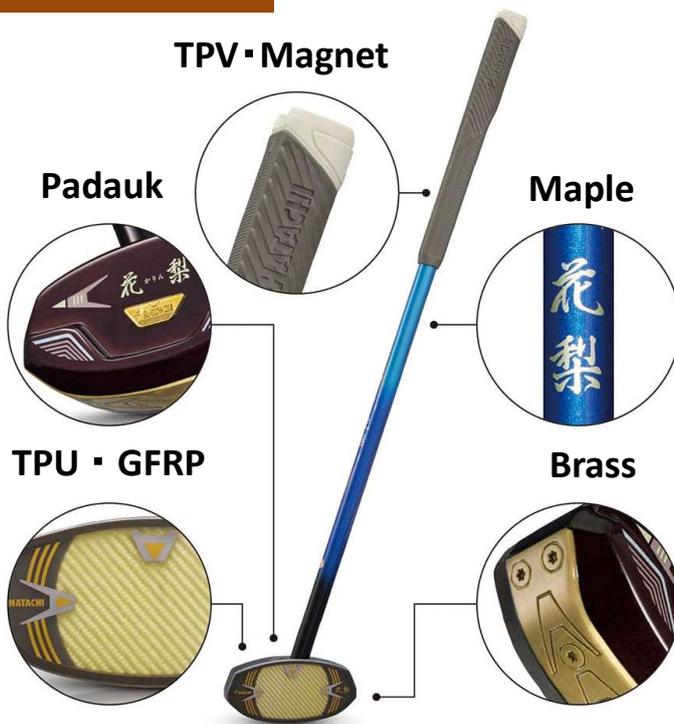

Since there are individual differences in physique, please use this information only as a reference when you are not sure which club to choose.

NEW KING KARIN GOLD MASTER

BH2897 22,140 JPY

[MATERIAL] HEAD : padauk, TPU, GFRP , brass
 SHAFT : maple wood
 GRIP : TPV, magnet(grip with marker holder)
 WEIGHT: Approx. 655g (84cm)
 PLACE OF PRODUCTION : Taiwan
 *JGGA certified product * Marker is sold separately.

MATERIALS

Heavyweight class
Approx. **655g**

KING POINT 1

Heaviest Straight Shaft

Using highest-specific-gravity padauk wood and a strong shaft, this model reaches maximum weight while still offering excellent maneuverability.

High center of gravity for easy handling

KING POINT 2

Hardness Padauk Wood

3 layer structure
Glass fiber TPU face

- TPU
- Glass fiber
- TPU

Gold face Padauk wood

Using high-hardness wood and a rigid gold face, it delivers exceptional rebound performance.

KING POINT 3

Exceptional workability with our newly designed shaft

New rigidity design for padauk

Strong Shaft

Push out powerfully without losing power

The shaft's stiffness design, which increases in thickness toward the head, prevents power loss and enables a strong, driving push.

POINT 1 Reasons Why People Choose Urethane Face

10mm
 Its urethane face elasticity helps it roll for a longer distance.

Repel with a soft 2-layer urethane face

POINT 2 Helps You Maintain a Steady Swing

Total weight around 635 g
 Approx. 15 g heavier than the previous model.

WEIGHT WEIGHT Improved Stability

POINT 3 Reduces Hand Numbness

The ball bounces with a soft impact sound
 The elastic face absorbs shock and prevents your hands from going numb.

NEW 3D PERSIMMON MASTER EDITION

BH2921 29,520 JPY

【MATERIAL】 HEAD : persimmon, carbon, TPU, brass
 SHAFT : maple wood, brass (reinforcement pipe)
 GRIP : TPV, magnet(grip with marker holder)
 WEIGHT: Approx. 710g (84cm) PLACE OF PRODUCTION : Japan
 *JGGA certified product * Marker is sold separately.

POINT 1 The 3D Shaft Helps You Hit the Ball in the Center

Equipped with patented 3D shaft technology, it positions the striking point on the shaft's extended line, allowing you to hit the ball with your body's central axis.

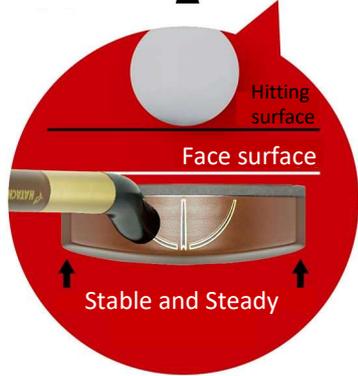

POINT 2 Axial Stability

3D shaft with perfect straightness.

Each one is finely tuned using patented technology. When you hold the club, the "hitting surface" and "face surface" are designed to be naturally horizontal.

POINT 3 Heavy Yet Easy To Swing

It is heavier than previous models, but its weight balance allows you to swing it stably and without unnecessary effort.

MATERIALS

POINT 1 Low Center of Gravity Head for Stable Swing

HATACHI's unique back cavity structure lowers the center of gravity of the entire head.

Good Stability

Low center of gravity

POINT 2 Club Face with High Distance Performance

The two-layer face is made of TPU resin, which is also used in high-end models. The high-performance face has excellent resilience and scratch resistance, increasing the distance the ball can fly.

WIN4 BH3433  P53	Solid	Around 94g
Color Ball BH3001  P54	Solid	Around 94g

Hollow

The center of the ball is hollow. The hollow center of the ball makes the outside of the ball heavier, so centrifugal force acts on it when it rolls, and it rolls well. In order to maintain strength, a hard and rigid resin is used, making the ball very responsive.

Solid

This ball is filled with resin all the way to the center of the sphere. It is characterized by its vivid color. The inner core repels and rolls powerfully. The hardness of the resin between the inner core and the cover layer that covers it can be varied to create a ball with good feel.

Ball Handling

- Do not use for any purpose other than ground golf.
- Store in a place away from direct sunlight.

NEW **AERO BALL**

BH3861

1,400 JPY

DIAMETER: Approx. 6 cm WEIGHT: Approx. 94g
 【MATERIAL】 Special synthetic resin
 PLACE OF PRODUCTION: Japan JGGA certified product

POINT 1 Get more distance!
 New 3-layer structure

A highly resilient resin is used in the core for greater distance. The mid layer uses a resin with an excellent hitting feel, and the cover features a highly abrasion-resistant resin. This is a new three-layer structure.

cover
 mid
 core
 cavity

* CG Image

POINT 2 Hollow structure for maximum distance

The ball has no blades and is hollow at the center, which enhances its rolling performance. Its weight distribution is evenly balanced, giving it a smoother and more refined roll.

Moment of inertia
 *According to our research

Approx. 6% improvement

106% Aero Ball
 100% Our solid Ball

Hollow structure
 The outer portion is heavier, generating greater centrifugal force.
